Cannabidiolic acid isolate

CBDA · CAS 1244-58-2 · C22H30O4 · 358.47 g/mol

SPECIFICATION	at least 99.9% CBDA by HPLC
FORM	Acidic isolate
FAMILY	Acidic species
IDENTITY	HPLC against a qualified reference standard; NMR or LC-MS when a primary standard is on allocation, disclosed on the COA
ASSAY BASIS	% w/w of the named cannabinoid
RESIDUAL PANELS	Residual solvent (ICH Q3C classes as applicable), heavy metals, pesticides — with the lot pack on request
STORAGE	2–8 °C after receipt
ORIGIN	Lot-level, disclosed on the COA (labs in Canada and the United States)
DOCUMENTS	COA per lot; SDS on request
INTENDED USE	Ingredient / research use only. Not for human consumption as sold. No structure/function or disease claims.

Volume tiers

Available: identity and assay cleared. Contact for pricing: quoted by a person within one business day. Coming Soon: no lot yet; inquiries welcome.

Notes

CBDA isolate handled as a cold-chain-preferred acidic cannabinoid. For laboratories that need the carboxylated species rather than decarboxylated CBD. Decarboxylates with heat. Specify storage: 2–8 °C recommended after receipt. Do not assume CBD-equivalent handling.

This sheet states the specification for the SKU. Measured values — identity method used, assay, other cannabinoids, residuals, appearance, water activity and origin — are reported per lot on the certificate of analysis that ships with the material. Destination jurisdiction is required on every inquiry; some materials (THCV and isomer-adjacent species) require review before shipment.
