Notes

CBL is a photochemical rearrangement product. Offered as a research-grade isolate for analytical libraries and impurity mapping. Typical commercial demand is 5 g–1 kg. Larger volume tiers stay on Coming Soon until a campaign is scheduled.

This sheet states the specification for the SKU. Measured values — identity method used, assay, other cannabinoids, residuals, appearance, water activity and origin — are reported per lot on the certificate of analysis that ships with the material. Destination jurisdiction is required on every inquiry; some materials (THCV and isomer-adjacent species) require review before shipment.
