Water-dispersible CBN powder

CBN-WD · CAS 521-35-7 · C21H26O2 + carrier · Cannabinoid-in-powder — on the COA

SPECIFICATION	Lot assay CBN-WD by HPLC
FORM	Spray-dried powder
FAMILY	Dispersible
IDENTITY	HPLC against a qualified reference standard; NMR or LC-MS when a primary standard is on allocation, disclosed on the COA
ASSAY BASIS	% w/w of the named cannabinoid (CBN-in-powder for the dispersible SKU)
RESIDUAL PANELS	Residual solvent (ICH Q3C classes as applicable), heavy metals, pesticides — with the lot pack on request
STORAGE	Sealed, cool, dry — powder takes water
ORIGIN	Lot-level, disclosed on the COA (labs in Canada and the United States)
DOCUMENTS	COA per lot; SDS on request
INTENDED USE	Ingredient / research use only. Not for human consumption as sold. No structure/function or disease claims.

Notes

A water-dispersible CBN powder for beverage, gummy, and powder-blend R&D. Carrier system disclosed on the technical sheet for the current lot. Assay is on a w/w CBN basis, not 98% isolate. Ask for reconstitution protocol and particle-size range before scale-up. Not a finished consumer product.

This sheet states the specification for the SKU. Measured values — identity method used, assay, other cannabinoids, residuals, appearance, water activity and origin — are reported per lot on the certificate of analysis that ships with the material. Destination jurisdiction is required on every inquiry; some materials (THCV and isomer-adjacent species) require review before shipment.
