## Notes

THCV isolate for qualified B2B buyers. Availability is campaign-based; most volume tiers open as Coming Soon until the current lot is released. THCV is a propyl analog. Buyers must confirm destination-state legality and any THC isomer limits before shipment. Peregrine does not ship to restricted jurisdictions.

This sheet states the specification for the SKU. Measured values — identity method used, assay, other cannabinoids, residuals, appearance, water activity and origin — are reported per lot on the certificate of analysis that ships with the material. Destination jurisdiction is required on every inquiry; some materials (THCV and isomer-adjacent species) require review before shipment.
